

# WAX RECOMMENDATION

## Krazy Klassic

Huron Meadows Metropark, Brighton, MI

Sunday, January 16, 2011

12 km CL Interval Start begins at 10:30 am EST

3 laps, 15 sec interval start

<http://nordicskiracer.com/eventview.asp?id=2434>

**Forecast/Conditions:** Cloudy with snow likely overnight and a low around 14. Calm wind becoming west around 5 mph. Mostly cloudy on race day with temperatures 17-20 °F and a chance of. Expect new packed powder and glazed tracks.

**Glidewax:** Apply LF Moly, scrape and brush, then apply HF Blue/Red mix, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad. X-

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-3 layers of Carbon GripWax Violet, corking between layers. Glazed tracks due to large skier volume and high humidity will cause snow to behave warmer than its measured temperature. Cover with Carbon GripWax Blue if needed for speed.

**Structure:** A universal grind covered by one pass with the Blue TOKO Structurite tool (old fine linear wheel) before JetStream application will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
