

Buying Guide: Briko-Maplus Rollerskis
Tue, Sep 28, 2010 - By Mike Muha

Italian ski wax and rollerski maker Briko-Maplus provide rollerskis to many national ski teams, include the US and Canadian teams. The North American distributor, Innovation Incorporated, sells the Briko-Maplus line through its web site <http://www.maplus.com/US-Rollerskis.html>. There's a lightweight three-wheel classic ski (the Tris), speed reducers are available on some classic models, and there are a couple very fast skate ski models for those looking to put the hurt on their bicycling buddies.

The web site also sells a complete line of spare parts, including forks, splash guards, bearings, wheels, bushings, etc.
