Wax Recommendation

Event

Priority Health Crazy Klassic, Huron Meadows Metropark, Brighton, MI. Sunday Jan 20th, 10km Classic

Forecast

Saturday Day- Mostly Cloudy and breezy with a High near 39F.
Saturday Night- Chance of snow showers, mostly cloudy with a Low around 19F.
Sunday Day- Partly Sunny with a High near 23F.

Structure

Medium grinds/structures-
For Classic add the 1MM T401 Super Riller the length of the base prior to HF Layer and 1MM T423 Broken V structure roller after final waxing through out entire ski base.

Glide Wax

Base Layer- MB77, one layer ironed in, let cool, scrape and brush.
LF Layer- LF6, one layer ironed in, let cool, scrape and brush.
HF Layer- HF6BW, one layer ironed in, let cool, scrape and brush.
Cera F Layer- FC78 Super Cera Powder or FC7WS Cold Turbo block.
FC78 Super Cera Powder- apply and iron in at 160C moving iron quickly, let cool and brush out using Cera brush, polish with Blue Nylon brush.
FC7WS Cold Turbo block- apply and Roto-Fleece into base using T18FC Roto-Fleece. Brush out using Cera brush, polish with Blue Nylon.

Kick Wax

Binder Layer- KX30 or KR30 Blue Klister- apply one thin layer and iron smooth, let cool 3-5 minutes.
Mid Layer- KX45 or KR45 Violet Klister- apply one thin layer on top of KX30 and smooth with cork or thumb. Let cool 1-2 minutes.
Kicking Layer- KX75 or KR70 Red Klister- apply one layer on top of KX45 and smooth with thumb.
Note- The midlayer is important to apply, this layer will keep the KX75 Red Klister from shearing off.
Remember to keep your skis moving when you step into your bindings so klister will not ice.
